Seeking **collaboration** with **passionate** designers, engineers and entrepreneurs

I've developed social websites, mobile apps, and designed everything from business cards to user experiences. I am **competent** and **comfortable** with digital media and new web technologies, and will **gladly** share my experience.

I am **happiest** working in a fast-paced, deadline-driven environment, and as part of a team where my work contributes to our success. Creating products that people will use is a passion of mine and the process is something I enjoy as much as the result.

If you are looking for a dedicated, creative, team-player, we should talk.

I **love** what I do and welcome any opportunity to work with like-minded individuals.
